

I signed up over a year ago for the do not call list, it has helped slow down some of the calls, but not all. I think the rules should be stricter, nationwide, not just NJ. It's bad enough getting SPAM on the internet, do we really need phone calls to? I, myself, have been deceived & ripped off by these phone solicitors to many times for thousands of dollars & I can't afford it anymore. I'm asking you to let NJs "Do not call" list stay as strong as it is. The public should have more rights than the telemarketers who annoy us with unwarranted & unwanted calls. If I want something, I should call them for it, not them calling me to sell me something & rip me off. Thank you for your time.
